Priority

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Germany on February 17, 2001. It is noted, however, that applicant has not filed a certified copy of the foreign application as required by 35 U.S.C. 119(b).

Applicant argues in the amendment filed November 12, 2004 that it is unnecessary to file a certified copy of the German priority application in connection with the instant application because a certified copy was filed with the international application. However, since the instant application was not filed under 35 USC 371, a certified copy must be filed in the instant application regardless of whether such a copy was filed with the international application. See MPEP § 1896.

Drawings

2. The replacement drawings filed on November 12, 2004 are approved.

3. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application in order to correct the draftsman's objections attached to the prior Office action. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Specification

4. The incorporation of essential material in the specification by reference to a foreign application or patent, or to a publication is improper (see the incorporation by reference to a German patent application at page 1, lines 8+). Applicant is required to amend the disclosure to include the material incorporated by reference. The amendment must be accompanied by an affidavit or declaration executed by the applicant, or a practitioner representing the applicant, stating that the amendatory material consists of the same material incorporated by reference in the referencing application. See *In re Hawkins*, 486 F.2d 569, 179 USPQ 157 (CCPA 1973); *In re Hawkins*, 486 F.2d 579, 179 USPQ 163 (CCPA 1973); and *In re Hawkins*, 486 F.2d 577, 179 USPQ 167 (CCPA 1973).

Allowable Subject Matter

5. Claims 1, 2, 4, 7-9, 13-16, 18-38 are allowed.

Conclusion

6. This application is not in condition for allowance because the incorporation of essential material in the specification by reference to the German priority document in the cross notes at the first paragraph of the specification is improper. In order to put the application in condition for allowance, applicant must to do EITHER of the following:

- a. Provide a certified copy of the German priority document.
- b. Delete the claim for priority to the German application in the cross notes and amend the disclosure to include the material incorporated by reference to the German

Art Unit: 3679

application that is not already in the specification. The amendment must be accompanied by an affidavit or declaration executed by the applicant, or a practitioner representing the applicant, stating that the amendatory material consists of the same material incorporated by reference in the referencing application. See *In re Hawkins*, 486 F.2d 569, 179 USPQ 157 (CCPA 1973); *In re Hawkins*, 486 F.2d 579, 179 USPQ 163 (CCPA 1973); and *In re Hawkins*, 486 F.2d 577, 179 USPQ 167 (CCPA 1973).

7. This application is in condition for allowance except for the formal matters noted above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
